PROFILE INFO

Aspiring AI/ML Engineer with strong foundations in Python and Computer Science fundamentals. Passionate about Machine Learning, Data Science, and Artificial Intelligence. Skilled in developing Python-based applications and eager to build intelligent systems using real-world datasets. Quick learner with strong analytical and problem-solving abilities.

TECHNICAL SKILLS

Programming Languages :

- Python, C, Java, HTML, CSS

AI/ML Libraries :

- NumPy, Pandas, Scikit-learn, Keras, Matplotlib, PyTorch, TensorFlow, OpenCV.

DataBase : SQL, MongoDB

Frameworks : Django, Flask

Tools:

- Jupyter Notebook, Google Colab, Git, GitHub, Kaggle, VS Code.

SOFT SKILLS

- Communication
- Creativity
- Time management
- Adaptability

LANGUAGES

- Telugu (Fluent)
- English (Intermediate)
- Hindi (Basics)

HOBBIES

- Poster designing
- Photography
- Listening music
- Learning & applying AI tools

CERTIFICATIONS

- NIELIT Machine Learning using Python certification, calicut.
- SimpliLearn Cloud computing certification
- Wadhvani Entrepreneurship certification.

EDUCATION

QIS College of Engineering and Technology(Autonomous), Ongole

- B.Tech - Computer Science and Engineering (2023 - 2027)
- CGPA: 8.75

Sri Nagabhairava Junior College, Ongole (2021 - 2023)

- Intermediate - MPC
- Percentage: 83.8

Sri Ramm High School, Ongole (2021)

- SSC 10th Class
- Percentage: 100

PROJECTS

1. Movie Recommendation System

- Built a movie recommendation system using Pandas and cosine similarity. (Recommendation engine)
- Created content based filtering to provide personalized recommendations for movies.

Technologies - Pandas, Cosine Similarity.

2. Spam Email Classifier

- Developed a spam mail classification model using NLP and Naive Bayes algorithm. (Text classification)
- Performed text preprocessing and trained the model for spam detection.

Technologies - NLP, Naive Bayes.

3. Face Mask Detection

- Developed a real-time face mask detection system using OpenCV and Tensorflow.
- Applied deep learning and computer vision techniques for precise detection. (Computer vision project)

Technologies - OpenCV, TensorFlow.

AICTE Virtual Internship Program - Eduskills

- Finished a Python Full Stack Development virtual internship.
- Learned the principles of front-end and back-end development worked with databases (MongoDB), HTML, CSS, Python, Django and Flask technologies.
- During the internship, I created simple web applications.
